

SURGERY

Hepatobiliary and Pancreatic Surgery Program

The Hepatobiliary and Pancreatic Surgery Program at Hackensack Meridian *Health* provides state-of-the-art multidisciplinary treatment for diseases involving the liver, pancreas, bile ducts, and gallbladder.

Our specialty trained hepatobiliary and pancreatic surgeon carefully reviews the aspects of each particular patient's situation and makes recommendations for treatment in a very timely fashion after exploring all options.

We collaborate with all physicians preoperatively and postoperatively to ensure optimal treatment with the best long-term results according to internationally established standards.

Surgical Expertise for Benign and Malignant Tumors

- Resection of a portion of the liver
- Resection of a portion of the pancreas
- Microwave/Radiofrequency ablation of liver tumors
- Drainage or removal of liver cysts or abscesses
- Drainage or removal of pancreatic pseudocyst
- Surgery for chronic pancreatitis to alleviate pain
- Removal of the gallbladder
- Bile duct surgery
- Complex gastrointestinal surgery
- Minimally invasive robotic surgery

Complex cases are presented at a multidisciplinary tumor board, bringing expertise to determine a patient's best possible cancer treatment and care plan.

Minimally Invasive Surgery

Our multidisciplinary and minimally invasive approach to liver and pancreatic diseases, provides our patient's with many surgical options. We offer laparoscopic and robotic approaches where appropriate which provide many benefits, including: less postoperative discomfort and pain, shorter hospital stays, earlier return to full activities, smaller scars, quicker recovery, and ability to start further treatment as soon as possible.

We utilize innovative solutions and technologies in our focused commitment to superior outcomes for our patients. As one of the largest cancer centers in Monmouth and Ocean counties, we offer expert clinical care close to home.

"Everything was perfect," Gail says. "Dr. Matteotti made it clear that he was my surgeon, that he would take care of me, and that I was on his team for life. That's exactly how I felt."— Gail L. is a two-time cancer survivor thanks to Dr. Matteotti's multidisciplinary and customized approach to her care.
