Residency: UMDNJ – Robert Wood Johnson
Medical School
Medical School: UMDNJ – Robert Wood
Johnson Medical School

Russell Ashinoff, M.D.

Fellowship: Emory University Hospital
Residency: NYU Medical Center
Medical School: SUNY Upstate Medical Center

Compelling Hope: Live a Life of Possibilities

To improve the quality of life for patients with traumatic injuries, stroke, or trauma, the specialists in the Center have created a world – class team using the most advanced surgical treatment options for paralysis and nerve reconstruction.

For some patients, traveling across the country and internationally, these surgeries offer new hope where traditional surgical procedures have failed. The team evaluates opportunities to improve the quality of life with patients, and determines if improvements may be possible with advanced surgical techniques.

Treatments encompass a range of methods to restore function that have been damaged through disease or nerve injury. Comprehensive management includes a series of treatment options for:

- Brachial plexus reconstruction
- Neuropathy decompression
- Stroke paralysis
- Pressure sores
- Diaphragm pacemaker for ventilator dependency
- Nerve transplantation
- Phrenic nerve injuries
- Swallowing disorders
- Nerve reconstruction
- Reconstruction for spinal cord injury and foot drop
