### Expert Care to Help Your Body Heal

The **Center for Wound Care and Hyperbaric Medicine** uses the latest diagnostic technology and therapeutic techniques to help heal wounds that have resisted other types of treatment.

#### Wound care services include:

- Ultrasound
- Pulse volume recordings (PVR)
- Electric stimulation
- Whirlpool therapy
- Synthetic skin grafts
- Doppler Studies
- Patient Education
- Hyperbaric oxygen therapy

#### Hyperbaric Oxygen Therapy

Hyperbaric oxygen therapy is a medical treatment that enhances the body's natural healing and strengthens the immune system. Delivered by our trained specialists, hyperbaric oxygen therapy is an effective option for many chronic wounds.

Conditions that can benefit from hyperbaric oxygen therapy include:

- Diabetic leg and foot wounds
- Chronic bone infections
- Acute arterial insufficiency
- Necrotizing infections
- Gas gangrene
- Carbon monoxide poisoning
- Crush injuries

The **Center for Wound Care and Hyperbaric Medicine** participates in most major insurance plans.
